DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Cameron Beddard on September 11, 2007.

Claims 1-6 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 7, 8 and 10-14, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on March 7, 2007 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the

provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01

In the third line of claim 10, please replace the words "a real" with the word areal.

Allowable Subject Matter

Claims 1-8 and 10-14 are allowed.

The following is an examiner's statement of reasons for allowance: None of the references of record teach or suggest the structure of claim 1, which is silver alloy particles, which have an outer coating of only silver, laminated to a transparent substrate. The prior art particles do not have a coating layer that contains only silver. All other allowable claims are dependent to claim 1.

The following references are made of record detailing the closest prior art to the above claims:

U.S. Patent 2,861,896 (Kraus) discloses silver alloy particles, which can have a silver alloy coating, laminated to a transparent substrate. The outer coating does not contain only silver.

WO 02/02472 (Gandon et al.) discloses silver alloy particles laminated to a transparent substrate. There is no separate outer coating layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
